

## PERMANENT HAIR REMOVAL

### Long term removal of all hair colours!

- Safe on all skin tones including tanned skins.
- Effective on all body areas.
- Effective on all hair types, including fair hair.
- Painless
- Effective on post IPL hair removal.

Applisonix's Selectif is the industry's first clinically proven ultrasound based hair removal solution.

Selectif Treatments are sold by the minute as each area treated varies from person to person. We recommend sessions of 15mins at a time, but can do as little 5mins per treatment.

5 minutes \$25 (\$5 per min)  
60min package \$285 (\$4.75 per min) valid for 6 months  
120min package \$525 (\$4.37 per min) valid for 10 months

### What makes ultrasound different?

A special ultrasound probe is used to focus the energy precisely on the hair follicle. Ultrasound is then channelled to the hair root where it is converted to heat, which then inhibits the hair growth.

### How many treatments will I need?

Hair treated in the anagen phase of growth should not grow back, but hairs not in the anagen phase will need to be retreated. Unfortunately there is no way of telling which hairs are in the anagen phase or not. Generally we recommend that most areas need 6-8 treatments. After this course of treatments, you may periodically require a top up treatment to treat semi dormant hairs which only come in to anagen on an annual basis.

### What is the recommended amount of time between treatments?

Typically 4 weeks between treatments is recommended. This does vary between individuals, body areas, hair characteristics etc. We will advise you in more detail during your first consultation.

### Are the results permanent?

Long-term results are dependant on hormones, genetics and medication, as these may stimulate hair growth.
